

To Whom It May Concern,

I have known Thomas Fletcher for the past two years. He was a student in my Integrated Math 3 and AP Statistics classes. His responsibilities as my student were to attend class regularly, master course concepts, and cooperate with others. Thomas is a responsible, intelligent, and motivated young man who is determined to be successful.

Thomas had an outstanding attendance record. On the rare occasion that he missed class he was prompt with asking for and completing missed assignments. Thomas's drive and initiative propelled him to an A in Integrated Math 3. He currently has an A in AP Statistics. He gave his best effort in order to learn course concepts. Thomas also took the time to explain concepts to others when asked. He had a knack for intuitively recognizing relationships among variables in problem situations. Although Thomas regularly solved problems correctly, his concern for why concepts and relationships were true outweighed simply knowing the correct answer. He understood that getting the right solution does not mean that the problem was worked correctly. Additionally, Thomas had a strong work ethic. If he and his partner finished solving problems early, he immediately took the initiative to work on the assigned homework problems. If Thomas made mistakes on his homework assignments, then he routinely asked questions in order to fix and learn from the mistakes. In addition, Thomas regularly participated in class. His questions and comments enhanced classroom discussions. Thomas had a unique blend of curiosity about why concepts were true and work ethic that I seldom observe in students.

In addition to excellence in the classroom, Thomas participated in and demonstrated leadership qualities in many extra-curricular events. He participated in the wind ensemble, the marching band, and the jazz band. He also competed and finished 2nd place in the chemistry lab division at the Flint Metro League Math/Science Competition at Holly High School.

Thomas has what it takes to be successful in any career of his choosing. I highly recommend him for acceptance to the university setting. He will be an excellent addition to any of the programs. If you have any further questions I can be reached at (810) 591-2251 ext. 1205 or mdavis@goodrichschools.org.

Sincerely,

Mark Davis
Mathematics Teacher
Goodrich High School
