To whom it may concern,

As an AP Calculus teacher at the Liberal Arts and Science Academy (LASA High School) in Austin, Texas, I strongly recommend Jeremiah Aziz as a candidate for a Tall Clubs International Foundation scholarship. Jeremiah was a kind, respectful, and hard-working student in my AP Calculus BC class this past year.

Jeremiah was a very good Calculus student. He obtained A's on almost every assessment in the course, and it came as no surprise that he scored a 5 on the AP Calculus BC Exam.

Although he was quite good at Calculus, Jeremiah was also humble. He was kind and worked incredibly well with the other students in the class. He was the type of student that other students wanted to have in their group. He was always more than happy to help his struggling classmates.

Jeremiah also showed great respect for his teachers. He would often greet me outside of class, wish me a good day at the end of class, and even thank me when I handed him Exams and Quizzes! His greetings were always with a smile.

Our school, LASA, is nationally recognized as an advanced academic magnet school where admission is competitive. The application process takes into account the student's prior academic record, standardized test scores, letters of recommendation, essays, and an entrance exam. In order to succeed after they've been admitted, students must be exceptionally diligent in their studies and possess an interest in high-level academic classes. All classes offered at LASA are honors-level, AP, or above, and it is normal for juniors and seniors to take more than five AP or college-level classes each year. In this academically rigorous environment, Jeremiah has been successful.

I have no reservations when recommending Jeremiah Aziz. I would expect him to be successful in a college environment. Any professor would enjoy having him for a student.

If you have any questions, please don't hesitate to email me.

Sincerely,

Terry Stripling, M.S., B.S.
